	PRIMARY EXCLUSIVE	April 25, 2005					

Continuation of 11. does NOT place the application in condition for allowance because: Applicants' arguments do not overcome the final rejection.

Applicant's arguments have been fully considered but they are not persuasive. The Examiner has thoroughly reviewed Applicants' arguments but firmly believes that the cited reference reasonably and properly meet the claimed limitation. Applicants are reminded that the Examiner is entitle to give the broadest reasonable interpretation to the language of the claimed as explained below. The Examiner is not limited to Applicants' definition which is not specifically set forth in the claims. In re Tanaka et al., 193 USPQ 139, (CCPA) 1977. Applicant argues that Websnake does not teach "compressing the plurality of resources associated with the desired Web page into the archive file". On the contrary, Websnake does teach a zip tools that lets users compress the containing resources associated with the web page (page 3). Furthermore, Applicant seems to be suggesting that Websnake fails to teach compressing resources into an archive file before sending the archive file to the client. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., compressing resources into an archive file before sending the archive file to the client) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Therefore, the claimed invention as represented in the claims does not represent a patentable over the art of record.
